

## LOCAL & TOLL FREE | IP Communications

### IPDID LOCAL ORIGINATION

IPDID Local Origination Service allows you to choose local phone numbers from any of our over five thousand service locations. Using our SIP trunks, we will aggregated your phone numbers over your existing broadband connection. This can give your business a virtual presence in any city of your choice and enable your customers to reach you simply by dialing a local number in their city.

Work Locally... Think Globally!

IPDID Local Origination Service also provides free inbound calling from any of our worldwide locations. Choose numbers from Europe, South America or any of our international calling areas, and we will deliver them to your business via our SIP Trunks with absolutely no per minute fees. This gives you the ability to create a virtual worldwide office presence without the need for costly circuits and co-location expenses.

IPDID provides your business the flexibility to purchase as little as one phone number at a time from any of our service locations and allow you to grow your business at your own pace. SIP Trunking eliminates the need for traditional private lines and co-location fees while providing you a single point of delivery for all your telephony services.

### IP800 TOLL FREE SERVICE

Does your business have the visibility it needs? With IP800 Toll-Free Origination Service from IP Communications, your customers can reach your business for free from anywhere in the US or Canada. With IP800, your customers simply dial a toll-free number and their calls are routed to your business using our SIP trunks.

Enjoy the benefits and cost savings of toll free delivery via SIP trunking while showing your customers that you put them first. With IP800, your business can create or expand its presence quickly and inexpensively. Whether your business is small or large, IP800 will grow as you grow.
